

Aries

Ruling Planet

Before we continue, you should know that your ruling planet is Mars

To better understand your life and things that go on in your life, is it essential to know the affects Mars has on your life and astrology Map

Mars is the planet of outward activity and animal passion including our sexual drive, aggression, and anger. Mars rules Aries and is exalted in Capricorn.

This fiery planet is masculine in action, versus the softer more receptive and romantic Venus.

When strong in the chart it can indicate a volatile temper, and also great courage.

Its position indicates how your personality will assert itself, and what modes of activity will stimulate your physical energies, or your anger.

By house, Mars represents where you will assert yourself, and where you will take

action in the most positive sense.
