10. Good day <name>! How are you feeling today?

Short Astrology Descriptions:

If you ever get a question about Astrology or How the Map is calculated - This is the Answer:

Answer:

Astrology is an ancient study and has appeared in many forms and applications through out the course of human history. My interpretations of Astrology are based primarily in Jungian psychology and Dane Rudhyar's Humanistic School of Western Astrology. I treat astrology as if it were a window from the material world into the spiritual plane, and it is our belief that anyone can gain greater self-knowledge from astrological study

Wait for Client Answer

Answer:

While We do not view astrology as causal– as in “Neptune made me do it!!” We are the ultimate creators of our own realities, yet astrology can help us to understand what archetypes and tendencies we are working with!

Does that make sense?

Wait for Client Answer

Answer:

Synchronicity is defined as 'the experience of two or more events as meaningfully related, though they are unlikely to be causally related.' In other words there is a symbolic relationship between the movement of the planets and our personal and collective human experiences here on earth.

If Client Asks further more how each Map is Calculated. This is the Answer

Answer:

Actually that is an excellent question. We take into consideration your time of birth, your name, date and your gender. We then calculate the planets location of ruling planets and see how they affect your life. Once that is done, we generate a map that specifies the current location of ruling planets based on our interpretations of Astrology in Jungian psychology and Dane Rudhyar's Humanistic School of Western Astrology.
